REPORT OF THE WHITE PINE BLISTER RUST WORK  
CARRIED ON IN THE TERRITORY UNDER THE  
SUPERVISION OF THE MISSOULA OFFICE  
FIELD SEASON 1918.

\*\*\*\*\*

By

Alfred H. W. Povah

and

George A. Root.

THE UNITED STATES OF AMERICA

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

WATER RESOURCES DIVISION

REPORT

BY

WILLIAM B. BROWN

AND

JOHN A. BROWN

REPORT ON THE WHITE PINE BLISTER RUST WORK  
CARRIED ON IN THE TERRITORY UNDER THE  
SUPERVISION OF THE MISSOULA OFFICE  
FIELD SEASON 1918.

\*\*\*\*\*

The territory covered by the blister rust workers in the jurisdiction of the Missoula Office includes: the entire states of Montana and Idaho; all of Wyoming except Sweetwater County; the Black Hills Region of South Dakota; and Spokane and Pend Oreille Counties of the State of Washington.

Five full assistants, including A. H. W. Povah, who had general supervision over the field work in this territory from the beginning of the season to September 1, and George A. Root from September 1 to the present time, were employed during the season just closed to inspect currants, gooseberries, and five-needle pines for the blister rust fungus (*Cronartium ribicola*).

REPORT OF THE UNITED STATES GEOLOGICAL SURVEY

ON THE GEOLOGY OF THE

STATE OF MONTANA

BY

W. H. DALL

The territory covered by the Blaine and Great Falls  
in the jurisdiction of the United States Indians; the  
entire states of Montana and Idaho; all of Montana, except  
Twistwater County; the Black Hills section of South Dakota;  
and Spokane and Lemhi Counties of the State of  
Washington.

Five assistants, including A. H. Townshend,  
and one general supervisor over the field work in this  
territory from the beginning of the season to September 1,  
and George A. East from September 1 to the present time, were  
employed during the season just closed to inspect and  
reconnoiter, and to make a preliminary plan for the Blaine and  
Twistwater (for extensive reconnoitering).

PERSONNEL OF BLISTER MUST WORKERS.

In charge: Dr. James R. Weir

In charge of field work:

Dr. Alfred H. W. Povah

Mr. George A. Root

Field Assistants:

Mr. Norman W. Scherer

Mr. Ferdinand S. Wolpert

Mr. Joseph Yencso

DIVISION OF THE DISTRICT AMONG FIELD MEN.

On view of the shortage of men available for the work, it was found necessary to reduce the number of men to the minimum. Consequently, each man had a larger territory than under normal conditions. The districts given the field men will be referred to as sub-districts, in order to conform to last year's report. Following is a list of the sub-districts covered by the field assistants, together with their headquarters:

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

In charge: Mr. James A. Bell

In charge of field work:

Mr. Alfred C. Brown

Mr. George A. Cook

Miss Assistant:

Mr. Norman E. Brown

Mr. William E. Brown

Mr. George A. Cook

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

In view of the shortage of men available for

the work, it was found necessary to reduce the number of

men to the minimum. Consequently, only one man was left

to take care of the work. The district

work was divided into two parts. The first part

was to be done by the first team of men. The second

part of the work was to be done by the second

team, together with their headquarters:

### Subdistrict One

This was partly covered by Field Assistant Joseph Yencso, whose headquarters was Great Falls, Montana, and by George A. Root, whose headquarters is Missoula, Montana. This subdistrict includes the entire state of Montana.

### Subdistrict Two

Field Assistant Norman W. Scherer, whose headquarters were at Spokane, Washington, was in charge. This district includes the entire state of Idaho, and Pend Oreille and Spokane Counties in Washington. The latter county was covered by Assistant in Charge, George A. Root, who also covered a portion of Idaho in conjunction with Mr. Scherer. This state is still uncompleted.

### Subdistrict Three

Field Assistant Ferdinand S. Wolpert, with headquarters at Sheridan, Wyoming, was in charge. This district includes the entire state of Wyoming, with the

## Investigation

This was a very good example of the kind of work that the Bureau has been doing in the past. The investigation was conducted in a very thorough and systematic manner, and the results were very satisfactory. The Bureau has been very successful in its efforts to bring about a more efficient and economical administration of the Government, and this investigation was a very good example of the kind of work that the Bureau has been doing in the past.

exception of Sweetwater County; and the Black Hills Region of South Dakota. Mr. Wolpert was unable to complete the work in his district before leaving for Camp Dodge, Iowa on July 22. Dr. Weir also did some inspection work in this state, but at present it is far from being completely covered.

#### MANNER IN WHICH THE WORK WAS DONE.

The Month of May was spent by A.H.W. Povah with the assistance of Mr. Joseph Yencso, in sorting and filing by counties and towns the blue cards prepared by Mr. Stillinger in Oregon and Washington. These cards record the sales of currants, gooseberries, and five-needle pines in this district by the following firms:

PUBLICITY WORK

Interest in the blister rust work was aroused among the people in the various districts, by newspaper articles in the local papers. These were written by the men in their respective districts. Posters and literature were also exhibited at the Interstate Fair, in Spokane.

MONTANA

Inasmuch as this data gave us only the sales from Western nurseries and it was desired to have as complete a record as possible, we went to Mr. A. L. Strausz,

1.11.2012

1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

1. The first part of the document is a list of names and addresses, including:

Montana State Horticulturist, to find out whether he had the desired data. From his records it was found that during the five and one half years from November 1911 to April 1917, over 100,000 currants and almost 80,000 gooseberries had been shipped into the state of Montana. Because of the fact that all the conifers were listed together, it was impossible to trace the shipments of five-needle pines into the state.

Another difficulty was encountered in the fact that no record was given of the ultimate consignees in the case of car-load shipments and lots consigned to agents to distribute. In instances such as these wither the nurseries were asked to cooperate by furnishing the required data, or the information was sought from the forest pathologist in whose territory the nursery happened to be located.

All of the sales data obtained from the office of the State Horticulturist were recorded on cards which were then sorted and filed with the cards prepared by Mr. Stillinger. This gave a complete record of the state sales of currants and gooseberries, to which have been added lists of sales from some of the nurseries within the state. The following is believed to be a complete list

Yellowstone Nursery,	Silesia, Mont.

Status of Montana Nurseries.

The Missoula Greenhouse and Nursery Co., of Missoula, Mont. grows but little of its nursery stock. From the incomplete record of invoices available, it was found that currants and gooseberries had been purchased: in 1908 from Jackson & Perkins Co., of Newark, N. J., who, in turn, procured the stock from Charles Detriche, Sr., Angers, France; in 1909, from Charles Detriche, Sr., Angers, France direct; and in 1909, 1910, and 1911 from the Mount Arbor Nurseries, Shenandoah, Iowa.

1914-1915

... ..

[illegible][illegible]

from the most recent literature, O. H. Brown, 1951

The Missoula Nursery Co., of Butte, Mont. grows none of its stock. Invoices showed purchases of currants, and gooseberries as follows: in 1918 from the Freemont Office of the Mt. Arbor Nurseries, Shenandoah, Iowa; during the years 1915, 1916, and 1917 bush fruits were bought of the Missoula Greenhouse and Nursery Co., of Missoula.

The State Nursery Co., Helena, Mont., has a large seed and greenhouse trade and also a fairly extensive nursery business. They, however, grow little except greenhouse stuff, buying their seeds and nursery stock. Mr. Mills informed us that he had purchased currants and gooseberries from the following sources: Jewell Nursery Co., Lake City, Minn., Missoula Greenhouse & Nursery Co., and Storrs & Harrison Co., Painesville, Ohio. In view of the fact that diseased pines were found in the last-mentioned nursery in 1910, 1911, and 1916, it was thought that currants and gooseberries shipped from this nursery at that time might have been infected. Consequently, bush fruits from the State Nursery Co., Helena, Mont. have been considered as dangerous.

The Avoca Nursery Co., of Butte, Mont. is affiliated with the Tidewater Investment Co., of the same

[illegible]

city, and is chiefly concerned with the planting up of their real estate deals. Mr. W. Mc C. White informed us that the nursery had neither bought nor sold any currants, gooseberries, or five-needle pines.

The Hamilton Nursery Co., Hamilton, Mont., does not grow any of its nursery stock. At the present time the owner is engaged in another business and their sales are few. According to Field Assistant Joseph Yencso, who visited the nursery this summer, they had no currants, gooseberries, or five-needle pines in the nursery.

The King - Thurman Nursery Co., Kalispell, Mont., operated from 1910-1916. They grew only a small part of their nursery stock. The rest they obtained from the following nurseries: Stark Brothers Nursery and Orchard Co., Louisiana, Mo.; Jewell Nursery Co., Lake City, Minn.; Mount Arbor Nurseries, Shenandoah, Iowa; and Oregon Nursery Co., Orenco, Ore.

The Hopper's Greenhouse and Nursery Co., Billings, Mont., does mostly a greenhouse business, i. e., cut flowers, bedding plants, and garden sets (tomatoes, cabbages, peppers, etc.). The few currants and gooseberries which they have sold were purchased from Shenandoah Nurseries, Shenandoah, Iowa.

The British Government, in its efforts to maintain the peace, has been most successful in its efforts to maintain the peace, and has been most successful in its efforts to maintain the peace.

THE LAY - ... ..

The Stillwater Nurseries of Columbus, Mont., operated from 1909-1913, going out of business with the death of the manager, Mr. Chas. A. Teall, in 1913. The data on their sales were obtained from the lawyer who settled up the estate and he told us that he believed the nursery grew most of their stock. This, however, is probably not the case.

The Montana Nursery Co., Billings, Mont. was founded in 1906 and was one of the largest nurseries operating in the state, having made a \$55,000 delivery in 1912. Incomplete invoice records show 15,000 currants and 16,000 gooseberries were purchased from the Mount Arbor Nurseries, Shenandoah, Iowa. The nursery went out of business in 1913.

The Billings Nursery Co., of Billings, Mont. was started in 1913 by one of the men formerly connected with the Montana Nursery Co., (Mr. Tighe) and was operated until the death of Mr. Tighe in 1916. The business was not very extensive and they did not grow their own stock but obtained it from the Mount Arbor Nurseries, Shenandoah, Iowa and the Shenandoah Nurseries, Shenandoah, Iowa.

The Yellowstone Nursery at Silesia, Mont. was not visited by Mr. Fovah (because of entering military service). Mr. Strausz, State Horticulturist, gave the following information: The nursery was founded in 1910 and at the present time is about to close out the business, having only fruit trees left in the nursery. It is believed that they handle

[illegible]

very little home-grown stock, but the source is unknown, although it is practically certain Eastern stock was bought.

The Interstate Nursery, Bridger, Mont. was likewise not visited by Dr. Fovah, but it is believed to be out of business. This will be verified, however, before the season of 1919.

The Home Nursery, Billings, Mont. was started in 1916. They do not grow much of their stock and have purchased currants and gooseberries from the Mount Arbor Nursery, Shenandoah, Iowa and the Gurney Seed and Nursery Co., Yankton, S. Dakota.

The so-called Page Nursery Co., Billings, Mont. was started in 1910. They have grown practically nothing with the exception of shade trees. They have been merely agents for the following nurseries: from 1910-1916 for the Jewell Nursery Co., Lake City, Minn.; from 1917 to the spring of 1918 for the Gurney Seed and Nursery Co., Yankton, S. Dakota. Beginning this fall (1918) they are going to represent the Clinton Falls Nursery Co., Owatonna, Minn.

The Froid Nursery Co., Froid, Mont. was established in 1915 and is still doing a small business. It does not grow the currants and gooseberries which it sells but has bought them from the Rose Hill Nursery, Minneapolis, Minn.

very little known, but the source is known,  
although it is practically certain that it  
is not.

The information, however, was that  
it was not taken by the owner, but it is believed to be  
the same as the one which was verified, however, before  
the date of this.

The information, however, was that  
it was not taken by the owner, but it is believed to be  
the same as the one which was verified, however, before  
the date of this.

The information, however, was that  
it was not taken by the owner, but it is believed to be  
the same as the one which was verified, however, before  
the date of this.

The information, however, was that  
it was not taken by the owner, but it is believed to be

the date of this.

and the Clinton Falls Nursery Co., Owatonna, Minn.

Nurseries Having Sold Stock in Montana.

In addition to the state nurseries, as given in the last list, the following concerns have sold nursery stock in Montana during the past eight years:

Albany Nursery Co.,	Albany, Oregon.
Andorra Nurseries,	Chester Hill, Pennsylvania,
Arlington Nursery & Fruit Farm,	Arlington, Nebraska
Corbett Bennett,	Billings, Montana
Berry Nursery Co.,	Rochester, N. Y.
Billings Nursery Co.,	Billings, Montana
Biltmore Nursery Co.,	Biltmore, N. Carolina
Bitter Root Valley Irrig. Co.,	Florence, Montana
" " " " "	Victor, Montana
Benjamin F. Bonnewell,	Denver, Colorado
Brand Nursery Co.,	Faribault, Minnesota
Brown Bros.,	Rochester, New York
Capital City Nursery Co.,	Salem, Oregon
Chinook Nursery,	Chinook, Montana
Clinton Falls Nursery Co.,	Owatonna, Minnesota
Clinton Nurseries,	Clinton, Minnesota
Columbia & Okanogan Nurseries,	Wenatchee, Washington
Deephaven Nursery Co.,	Wayzata, Minnesota
Deerfield Nursery,	Medford, Minnesota
Des Moines Nursery Co.,	Des Moines, Iowa
Charles Detriche, Sr.,	Angers, France
A.H.Downing,	Hamilton, Montana
Henry A. Dreer, Inc.,	Philadelphia, Penn.
Dungan Watson Co.,	Freemont, Nebraska
Elliott Nursery Co.,	Pittsburg, Pennsylvania
Fairmont Nursery Co.,	Address unknown
Farmers Seed and Nursery Co.,	Faribault, Minnesota
Geo. W. Forner,	Payette, Idaho
Galbraith Nursery,	Fairbury, Nebraska
The Galloway Bros. Co.,	Waterloo, Iowa
Geneva Nurseries,	Geneva, New York

*[Faint handwritten notes at the bottom of the page]*

U.S. DEPARTMENT OF THE INTERIOR

1950-1951

During the last year at the University of Chicago

1. The first of these is the fact that the  
 2. Government has not yet decided whether it  
 3. will accept the offer of the United States  
 4. to purchase the Alaska Pipeline. This  
 5. decision is of great importance to the  
 6. United States and to the world. It will  
 7. determine whether the United States will  
 8. be able to secure a reliable source of  
 9. oil for its own needs and for the needs  
 10. of the world. It will also determine  
 11. whether the United States will be able to  
 12. secure a reliable source of energy for its  
 13. own needs and for the needs of the world.  
 14. The second of these is the fact that the  
 15. Government has not yet decided whether it  
 16. will accept the offer of the United States  
 17. to purchase the Alaska Pipeline. This  
 18. decision is of great importance to the  
 19. United States and to the world. It will  
 20. determine whether the United States will  
 21. be able to secure a reliable source of  
 22. oil for its own needs and for the needs  
 23. of the world. It will also determine  
 24. whether the United States will be able to  
 25. secure a reliable source of energy for its  
 26. own needs and for the needs of the world.

1. The first of these is the fact that the  
 2. government has been unable to raise the  
 3. necessary funds to meet its obligations.  
 4. This is due to a number of factors,  
 5. including the fact that the government  
 6. has been unable to attract foreign  
 7. investment, and the fact that the  
 8. government has been unable to raise  
 9. the necessary funds to meet its  
 10. obligations.

In obtaining data on the sales of nursery stock  
by the nurseries within the state, the proprietor or manager

[illegible]

The following is a list of the names of the persons who have been appointed to the various positions in the various departments of the Government, as shown in the accompanying table:

In one study, 60% of the sales of heavy trucks

The research also found that the majority of heavy truck

was asked to cooperate by permitting us to go over his  
i  
invoices and sales in order to record data on currants,  
gooseberries, and five-needle pines on the cards. In  
some cases, order books were available, but in others  
(the majority, in fact), it was necessary to go through  
the original orders. This slowed down the work consid-  
erably because of the poor chirography. Much credit  
must be given to the nurseries for their willingness to  
cooperate, for it would have been impossible to obtain  
complete data without their help.

Having thus completed the compilation and record-  
ing of data, there remained but the work of inspection,  
which Field Assistant Joseph Yencso began on June 19th.  
The account of this work will be found under the title  
"Resume of work in Subdistrict 1."

IDAHO AND SPOKANE AND PEND OREILLE COUNTIES  
OF WASHINGTON

I. Idaho.

The problem of obtaining the required sales data  
in Idaho was much more difficult than in the case of Mon-  
tana. This was due to the fact that the records

was asked to cooperate by permitting us to go over his  
invoicing and notes in order to record same on computer.  
Consequently, our five-needle times on the cards. In  
some cases, other notes were available, but in others  
(the majority, in fact), it was necessary to re-think  
the original orders. This showed that the work consid-  
ered because of the poor character of the original  
must be given to the nurses for their willingness to  
cooperate, for it would have been impossible to obtain  
complete data without their help.

Having thus completed the compilation and record-  
ing of data, I then returned to the work of hospital,  
which I did until Joseph Yarnes left on June 15th.  
The account of this work will be found under the title  
"History of work in Statistics I."

#### WORK ON THE STATISTICS OF THE HOSPITAL

##### STATISTICS

##### I. 1940.

The problem of obtaining the required sales data  
in 1940 was more difficult than in the case of 1939-  
1940. This was due to the fact that the records

of the State and Entomologist are too meagre to be of any use; to quote from a letter of Field Assistant, N. W. Scherer, "My search shows conclusively that there are no records in the office to show what each shipment, inspected by the deputy inspectors, contained. Hence it will be utterly impossible to trace Ribes or Pimus shipments into the state from this office." About the only things that Mr. Scherer was able to get from the above source were: (1) an incomplete record of the firms that have shipped stock into the state; (2) meagre data on the nurseries now operating within the state; (3) - perhaps the most important of all - a promise of reformation which a few quotation from Mr. Scherer's letter of June 19 will explain.

"Mr. Graham ( State Entomologist) has agreed to the following suggestions made by me:

- (1) That he will cooperate in every way possible.
- (2) That quarantine No. 8 (Blister Rust) be amended.
- (3) That card index records be kept of all shipments into the state.
- (4) That men with better education be secured as deputy inspectors."

The following list is believed to include all the nurseries now operating in the state of Idaho, although

of the State and Entomologist and too many to be of any use;

to quote from a letter of Field Assistant, W. F. Scherer,

"My answer shows conclusively that there are no records

in the office to show what each shipment, inspected by

the deputy inspectors, contained. Hence it will be neces-

sary impossible to trace ships or firms shipments into the

State from this office." About the only thing that

Mr. Scherer was able to get from the above source were:

(1) an inspection record of the firms that have shipped

stock into the State; (2) inspection data on the numbers

now operating within the State; (3) - perhaps the most

important of all - a promise of information which a few

quotations from Mr. Scherer's letter of June 11 will

explain.

Mr. Scherer (State Entomologist) has agreed to

the following suggestions made by me:

(1) That he will cooperate in every way possible.

(2) That documents No. 3 (Biller West) be amended.

(3) That card index records be kept of all shipments

into the State.

(4) That new and better education be secured as far

as possible.

The following list is believed to include all

the numbers now operating in the State of Idaho, although

it has not been verified, as in the case of Montana, by visits to each nursery. Mr. Scherer in the letter quoted above says: "There are practically no nurseries in the state that grow their own shruberry or other nursery stock. Most of them are jobbers and distributors". The notes after the nurseries in the following list are those of Mr. Scherer obtained from Mr. Graham.

Nurseries Now Operating in Idaho

Blackfoot Nurseries,	Blackfoot, Idaho
Caldwell Nurseries, Ships in a large amount of stock.	Caldwell, Idaho
Anton Diedrichsen, Grows ornamental stock & is very successful with it.	Payette, Idaho
C. H. Goan, Business in a small way - just about to close out.	Grangeville, Idaho
Idaho Nursery Co., Jobbers - not licensed now. Ship in most of their stock from Washington & Oregon and distribute it.	Weiser, Idaho
Idaho State Nursery Co.,	Nampa, Idaho
Intermountain Nursery Co., Operating on a small scale - ship in about 50% of stock.	Payette, Idaho
Kimberly Nursery Co., Grow some stock.	Kimberly, Idaho

Nurseries Now Operating in Idaho (Cont'd.)

D.H. Peck & Co.,  
Ships in all his stock - just  
a jobber.

Twin Falls, Idaho

Rupert Nursery Co.,  
Still operating on a small  
scale - grow some of their  
stock.

Rupert, Idaho.

Spokane Fruit Growers Ass'n.  
Jobbers - handle mostly fruit  
trees, but some shrubs.

Coeur d'Alene, Idaho

J. E. Steincour,  
Not licensed for least 3 years,  
may be out of business.

Murtaugh, Idaho

E. F. Stephens,  
Dealer.

Nampa, Idaho

Twin Falls Prudential Nursery Co., - Twin Falls, Idaho  
Not licensed now, perhaps they  
are out of business.

The following list, as complete as was possible  
to obtain, shows the firms that have shipped stock into  
Idaho during the years, 1907, 1912, 1913, 1914, 1915, 1916,  
1917, 1918.

Because of the fact that, even with the incomplete data at hand, there were more inspection cards than Field Assistant Norman W. Scherer could cover in a single field season, it was determined to inspect what stock we had listed. This included sales from the Western nurseries (on blue

cards ) included in the first list of this report and sales made by Montana nurseries in Idaho. Mr. Scherer began inspecting in Pend Oreille County, Washington, about the third week in June. After completing this county he went into Boundary County, Idaho, working south, thence eventually completing Bonner and Mootenai Counties. After the departure of Mr. Scherer at this time (September 19) one of the writers, Mr. George A. Root, continued with the work in Idaho and completed Shoshone County.

## II. Spokane and Pend Oreille Counties,

### Washington.

The sales of Pine and Ribes in this section of Subdistrict II are mostly from Western nurseries. A personal interview with Mr. M.L. Dean, Chief of the Division of Horticulture at Olympia, has not been possible, but a letter requesting nursery information was forwarded, and cooperation in this work was kindly offered.

The following list is believed to include the nurseries and agents operating in this district:

A.L. Burt,  
Small nursery. Ships in  
stock when needed.  
Irmas and Klaffenbach  
Small nursery. Ships in  
good deal of stock.

Spokane, Wash.

" "

cards ) included in the first list of this report and  
 also made by numerous persons in Idaho. Mr. Scherer  
 began investigation in Ford Orellia County, Washington,  
 about the third week in June. After completing this  
 county he went into Bonanza County, Idaho, working  
 some, then eventually completed Idaho and proceeded  
 to Oregon. After the departure of Mr. Scherer at this  
 time (September 29) one of the writers, Mr. George A.  
 Root, continued with the work in Idaho and completed  
 Shoshone County.

# II. Shoshone and Ford Orellia Counties.

## Washington.

The case of this case is in this section of  
 Subpart II are mostly from Western sources. A per-  
 sonal interview with Mr. J. H. Lee, Chief of the Division  
 of Investigation at Olympia, was not possible, but a  
 letter requesting necessary information was forwarded, and  
 cooperation in this work was kindly offered.

The following list is believed to include the

names and names appearing in this list:

- A. L. Hart,
- Small nursery, ships in
- stock and needed.
- Irma and Jackson
- Small nursery, ships in
- foot of stock.

Toppenish, Wash.

Owing to the large number of cards for Spokane County, it was deemed advisable to inspect the most important ones, including those representing pine shipments. This was done in order that inspection might be made in other important districts.

#### WYOMING.

Conditions for securing data in Wyoming were found by Field Assistant Ferdinand S. Wolpert to be even worse than in Idaho. Moreover, there is no Blister Rust Quarantine. The following quotation from a letter of Mr. Wolpert's written June 10th, will explain the situation:

"The state records are very meagre, giving me no available material other than the list of nurseries which are doing or have done business in the state. The board (State Board of Horticulture) here is in the hands of

Longport, Oregon	Bellevue and Son
Marine City, Michigan	Long City Nursery Co.
Hilltop, Oregon	Hilltop Nursery Co.
Oregon, Oregon	Oregon Nursery Co.
Washburn, Oregon	Oregon and Idaho Nursery Co.
Portland, Oregon	J. B. Pinkington
Lawson, Oregon	Los Angeles Nursery Co.
Portland, Oregon	Lawson Nursery and Fruit Co.
Massachusetts, Oregon	Massachusetts Nursery Co.
Portland, Oregon	Portland Nursery Co.

Owing to the large number of cases for Spokane County, it was deemed advisable to inspect the most important ones, including those representing the shipper. This was done in order that inspection might be made in other important cases.

#### YOUNG.

Conditions for securing data in Young were found to be very satisfactory. Assistant Attorney General S. W. Young to be even worse than in Idaho. Moreover, there is no list of Mr. Young's written June 1904, will explain the situation. The following statement from a letter of Mr. Young's written June 1904, will explain the situation: "The state records are very meagre, giving me no available material other than the list of trustees which are only of value done business in the state. The board (State Board of Horticulture) here is in the hands of

Dr. Nelson completely, and, as he told me, he has time for it only when he forces himself to take time. As a result, the available data is practically nothing." At the time of writing this report a list of nurseries operating in the state of Wyoming was not available. A reply to a letter to Dr. Nelson of the State Board of Agriculture asking for this list, is expected at any time. All inspection cards on hand at the present time represent sales from outside nurseries.

In the hope of getting some data on the stock shipped into Wyoming, Mr. Wolpert wrote to the nurseries that had been shipping stock in and asked them to cooperate by sending him lists of all their Wyoming sales of currants, gooseberries and five-needle pines for the past seven years. It was as surprising as it was gratifying to note how many of the nurseries sent back the desired data.

The following list shows the nurseries that have done business in Wyoming and was communicated to Mr. Wolpert by Dr. Aven Nelson, Secretary of the Wyoming State Board of Horticulture.

Mr. Nelson completely and, as he told me, no time  
for it only on he forces himself to take time. As a  
result, the available data is practically nothing. At  
the time of writing this report a list of names of op-  
erating in the State of Wyoming, was not available. A  
reply to a letter to Mr. Nelson of the State Board of  
Agriculture asking for this list, is expected at any  
time. All information made at hand at the present time  
represent sales from cattle nurseries.

In the hope of getting some data on the  
stock shipped into Wyoming, Mr. Wolpert wrote to the nur-  
series that had been shipping stock in and asked them to  
complete by sending him lists of all their shipping sales  
of cattle, horses and five-headed pigs for the  
past seven years. It was anticipated as it was prob-  
able to note how many of the nurseries sent back the  
desired data.

The following list shows the nurseries that  
have one business in Wyoming and was communicated to  
Mr. Wolpert by Mr. Aver Nelson, Secretary of the Wyoming  
State Board of Agriculture.

Nurseries Having Sold Stock in Wyoming.

RESUME OF WORK IN SUBDISTRICT I.

Field Assistant Joseph Yencso began the work of inspection in this district in Montana on June 10th, and continued until September 30th, at which time he was called

into military service. The writer, Mr. George A. Root, continued the field work left by Mr. Yencso, starting in on Lincoln County, but owing to illness was only able to devote three days to the work, - October 17, 18, and 19.

A total of 1,357 inspections have been made. These are divided among the following counties: Missoula, 421; Mineral, 48; Ravalli, 143; Sanders, 386; Flathead, 330; and Lincoln, 29. The following number of shipments were unable to be located in each county: Missoula, 131; Mineral, 5; Ravalli, 63; Sanders, 13; Flathead, 354; and Lincoln, 4, making a total of 580. Adding to this the number of actual inspections makes a total of 1, 937 inspection cards accounted for in this district.

In Missoula County inspections were made in 21 towns and villages, more than half of the inspections being confined to Missoula and Ronan; in Mineral in 9 towns, the number in each town being nearly equal; in Ravalli in 9 towns, one-third of the inspections being made in the towns of Hamilton and Stevensville; In Sanders in 19 towns, one-third being made in the towns of Camas and Dixon; in Flathead inspections were made in 22 towns, one-half being made in the towns of Kalispell and Polson; and in Lincoln County in 3 towns. The latter county is still incomplete.

into military service. The writer, Mr. George A. Root, continued the field work left by Mr. Lencoe, starting in Lincoln County, but owing to illness was only able to devote three days to his work. - October 14, 15, and 16. A total of 1,237 inspections have been made. These are divided among the following counties: Lincoln, 431; Mineral, 10; Ravalli, 143; Sanders, 303; Johnson, 100 and Lincoln, 20. The following number of inspections were made to be located in each county: Lincoln, 111; Mineral, 10; Ravalli, 63; Sanders, 13; Johnson, 64; and Lincoln, 1. Making a total of 200. Adding to this the number of actual inspections made a total of 1,237 inspections can be accounted for in this district.

In Lincoln County a special report was made in 19 towns and villages, more than half of the inspections being confined to Lincoln and Mineral; in Lincoln 9 towns, the number in each town being nearly equal; in Ravalli in 9 towns, one-third of the inspections being made in the towns of Hamilton and Lewisville; in Sanders in 19 towns, one-third being made in the town of Carson and 1 town; in Johnson 19 inspections were made in 19 towns, one-half being made in the town of Hamilton and Johnson; and in Lincoln County in 9 towns. The latter county is still incomplete.

RESUME OF WORK IN SUBDISTRICT II.

I. Idaho.

Field Assistant Norman W. Scherer began work at Boundary County, completing that county and also Bonner and Kootenai Counties. A few inspections of pine and Ribes were also made in Latah County. The writer, as previously mentioned, completed Shoshone County, starting work there September 24th.

A total of 821 inspections have been made, divided among the following counties: Boundary, 116; Bonner, 283; Kootenai, 293; Shoshone, 104; and Latah, 25. The following number of shipments were unable to be located in each case: Kootenai, 50; Boundary, 8; Bonner, 11; and Shoshone, 17. This makes a total of 76 unlocated cards, which, added to the list of inspected ones, brings the total to 897 cards accounted for in Idaho.

In Boundary County inspections were made in 11 towns or villages, more than one-half being made in Bonner's Ferry, and vicinity; in Bonner County in 30 localities, the number in each place being nearly equal; In Kootenai County in 32 localities, a little more than one-third of the inspections being made in Coeur d'Alene and vicinity; in

REPORT OF THE INDEPENDENT

I. Idaho.

Field Assistant Norman E. Cooper began work at Lemhi County, completing that county and also Bonner and Kootenai counties. A few inspections of pine and firs were also made in Latah County. The writer, as previously mentioned, completed Moscow County, starting work there September 1931.

A total of 531 inspections have been made, divided as follows: Bonner, 115; Kootenai, 104; and Latah, 22. The following number of shipments were made to be located in each case: Kootenai, 50; Bonner, 6; and Latah, 17. This makes a total of 73 unlocated birds, which, added to the list of inspected ones, brings the total to 604 birds accounted for in Idaho.

In Bonner County inspections were made in 11 towns or villages, with each one-half being made in Bonner's party, and visiting in Bonner County in 30 localities, the number in each place being nearly equal. In Kootenai County in 32 localities, a little more than one-third of the inspections being made in each town and vicinity.

Shoshone in 11 towns or villages, one-fourth being confined to the City of Kellogg; and in Latah County inspections were made in Moscow only. This latter county is still incomplete, but these few inspections were made as they included shipments of Eastern white pine.

## II. Spokane and Pend Oreille Counties,

### Washington.

Field Assistant Norman W. Scherer and one of the writers, George A. Root, made inspections in Pend Oreille and Spokane Counties, respectively. The number of inspections for this district is 178, divided as follows: Pend Oreille County, 128, and Spokane County, 50. In Pend Oreille one shipment was unable to be located, and in Spokane, 11. This total of 12, added to the above total of 128, brings the total number of cards accounted for up to 139.

In Pend Oreille County inspections were made in 16 towns, about one-third being made in New Port. In Spokane County inspections were made in 7 towns, 90% being made in the vicinity of Spokane. Pend Oreille County is completed, but a considerable amount of work still remains to be done in Spokane County. These have included, however, all known pine shipments.

houses in 11 towns or villages, one-fourth being confined to the city or village; and in Indian County inspections were made in Moscow only. This latter county is still incomplete, but these few inspections were made as they included all parts of western white pine.

## II. Inspection and Quarantine Stations.

### Inspection.

Field Assistant Kenneth E. Bennett and one of the visitors, George A. Root, made inspections in Sand County and Spokane Counties, respectively. The number of inspections for this district is 176, divided as follows: Sand County, 133, and Spokane County, 43. In Sand County one shipment was made to be inspected, and in Spokane, 11. This total of 14, added to the above total of 162, brings the total number of cars accounted for up to 176. In Sand County 1 inspection was made in 16 towns, about one-third being made in New York. In Spokane County inspections were made in 7 towns, 50% being made in the vicinity of Spokane. Sand County total is completed, but a considerable amount of work still remains to be done in Spokane County. That work included, however, all known pine shipments.

### RESUME OF WORK IN SUBDISTRICT III.

Field Assistant Ferdinand Wolpert began inspecting in Wyoming on June 18, 1918. The work progressed rapidly until Mr. Wolpert, having been called to the colors, left for Camp Dodge, Iowa, on July 22. Dr. James R. Weir, while in Wyoming, later in the summer, did some further inspection of nursery shipments. A total of 184 inspections were made in Wyoming. These are divided among the counties as follows: Sheridan, 53; Park, 94; Weston, 8; Albany, 3; Crook, 6; Fremont, 12; Carbon, 6; Big Horn, 1; and Niobrara, 1. The following number of shipments were unable to be located; 5 in Sheridan; 1 in Fremont, and 1 in Big Horn, making a total of 7. The number of cards accounted for in Wyoming total 191.

In Sheridan County inspections were made in 2 towns, 90% being in Sheridan and vicinity; in Park inspections were made in 4 towns, 85% being in Powell; in Weston, 2 towns; in Carbon, 2; in Albany, 1; in Crook, 1; in Fremont, 1; in Big Horn, 1; and in Niobrara, 1. None of these counties are completed.

TABLE OF CASES IN JUDICIAL SALE.

This assistant foreman report upon inspection in Wyoming on June 1st, 1910. The work progressed rapidly until Mr. Tolpelt, having been called to the colors, left for Camp Dodge, Iowa, on July 22. Mr. James T. Blair, while in Wyoming, later in the summer, did some further inspection of necessary shipments. A total of 184 inspections were made in Wyoming. These are divided among the counties as follows: Sheridan, 33; Park, 24; Weston, 8; Albany, 8; Crook, 6; Fremont, 12; Carbon, 6; Big Horn, 1; and Niobrara, 1. The following number of shipments were made to be located: 5 in Sheridan; 1 in Fremont, and 1 in Big Horn, making a total of 7. The number of cards accounted for in Wyoming total 131. In Sheridan county inspections were made in 3 towns, 90% being in Sheridan and vicinity; in Park inspections were made in 2 towns, 80% being in Powell; in Weston 3 towns; in Carbon, 2; in Albany, 1; in Crook, 1; in Fremont, 1; in Big Horn, 1; and in Niobrara, 1. None of these counties are connected.

### SUMMARY

With a decrease in the force of men which would ordinarily be required to cover the entire district, considering the large number of cards on hand, it was deemed best to cover as much of the area as possible within the Western white pine belt. It was hoped that the work might be completed as far south as the Clearwater River, as this would include pretty much the white pine area. As it now stands, the territory is completed as far south as Benewah County. A little more than one-half of the white pine area has been covered, together with certain parts of Wyoming. (See blueprint and maps accompanying this report).

In Montana inspections were made over an area covering the entire portion of the Western Pine. As previously mentioned, 1, 937 inspection cards were traced in 83 towns in 6 counties. Very few of these represented white pine shipments.

In Idaho and Pend Oreille and Spokane Counties of Washington, inspections were made in the heart of the white pine area, and numbered 1, 036, covering 108 towns and localities in 7 counties. The largest number of white pine shipments were located in this subdistrict, the largest

WHITE PINE

With a decrease in the volume of work which would ordinarily be required to cover the entire district, however, the large number of acres on hand, it was deemed best to cover as much of the area as possible within the Western White Pine belt. It was hoped that the work of the be completed as far south as the Silver River, as this would include pretty much the White Pine area. As it now stands, the territory is completed as far south as Comstock County. A little more than one-half of the White Pine area has been covered, together with certain parts of Esmeralda (see blueprint and maps accompanying this report). In Western Esmeralda no work was done over an area covering the entire portion of the Western area. As previously mentioned, 1,000,000 acres were covered in 50 towns in the territory. Very few of these represented white pine timber.

In Idaho and Montana Esmeralda and Comstock counties were made in the heart of the white pine area, and covered 1,000,000 acres and 10- million in 7 counties. The largest number of white pine shipments were located in this territory, the largest

individual shipments being at the University of Idaho at Moscow. These plantings originally comprised some 1,200 trees, but some of these have been shipped as orders to various places throughout Idaho and Washington.

In Wyoming inspections were made here and there in a general way. Inspections numbering 191 took place in 17 towns in 9 counties. Very few pine shipments were made into this state. Ribes and pine shipments traced in the entire district number 3, 164, divided among 208 towns and localities in 22 counties. The number of pines in the above inspected shipments is 1,565, and the approximate number of Ribes is 48, 650.

The Office at Missoula has in its files at the present time 8, 555 uninspected cards, distributed among 601 localities, in Subdistrict 1. Not over 12 of these represent Eastern Pine shipments.

In Sub-district 2 there are 5, 192 cards distributed among 312 localities. Here is found the largest number of cards representing white pine shipments, which number 15.

In Subdistrict 3, 708 cards are still uninspected distributed among 109 localities. Summing up the total for the entire district there are 14, 455 cards, distributed among 1,022 towns or localities. These cards represent a total

Individuals who were in the vicinity of the  
at Moscow. These plans are originally copied from  
1,200 trees, but some of them have been copied on other  
to various places in the State and Washington.  
In 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 261

of approximately 581, 000 Ribes and 1,250 white pine.

At this point may be mentioned the fact that the area in which inspections have been made is apparently free from the rust, and while this does not conclusively prove that the entire district is free, it is hoped that such is the case. It should, however, relieve a certain amount of anxiety felt in regard to this Northwest section.

#### NOTES.

Conditions for the spread of the white pine blister rust are most favorable throughout the entire district. Wild Ribes of all varieties abound in the canyons, along brooks and roadsides. These were often inspected where found. Cultivated Ribes are distributed throughout the entire district. In Spokane County there are innumerable plantings, located in the orchard regions of the Spokane Valley. These plantings often consist of several hundred bushes, and from which a partial livelihood is gained from the sale of the fruit. There are perhaps more Ribes per square mile in this section than in any other in the entire district. The native white pine are quite a distance away from this locality. The land boom in and around Spokane several years ago was instru-

of approximately 581,000 lbs and 1,150 white pine.  
At this point the investigation was continued and the  
area in which investigations have been made is approximately 100  
from the west, and while this area is not necessarily large  
that the entire district is free, it is not a small area in  
the case. It would, however, require a considerable amount of  
energy to find in regard to this district.

### III.

Conditions for the growth of the white pine dis-  
tributed are most favorable throughout the entire district.  
Wild fires of all varieties shown in the various maps.  
Growth and conditions. These are often found in the same  
cultivated areas as distributed throughout the entire dis-  
trict. In some cases there are considerable quantities  
located in the various regions of the district. These  
quantities often consist of several hundred pounds, and from  
which a partial dividend is gained from the sale of the  
fruit. There are many more than this for some time in this  
section than in any other in the entire district. The native  
white pine are quite a distance away from this locality. The  
land shown in the various maps is not a small area.

mental in bringing about large sales of nursery stock, both for orchards and landscape plantings, including Eastern white pine. Several small plantings were noted in the grounds of some residences. These proved to be from Eastern nurseries, and cards for those shipments were lacking. Such conditions may be true in other places, and sharp watch should be kept for such plantings, especially in residential sections.

It is not surprising that many of the nursery shipments as listed on the cards could not be located, for the population of this district, especially in Idaho and portions of Montana, is more fluctuating than perhaps any other state in the Union. Many places were abandoned, with the stock gone, either having been eaten by cattle or died from neglect and drought. In the entire district there are 674 unlocated cards. As an illustration of conditions; the writer will cite the case as found in Polson in Flathead County, Montana. Of the 292 cards for that town, 69 were unable to be located; 85 had moved, and bushes nowhere to be seen; 60 were found to be dead, and 78 healthy. This is the largest percentage noted, but should not be applied to all sections, however.

The people as a whole, throughout the entire district, are ignorant of the disease and its devastating character. Educational campaigns should be pushed with vigor, through the use of posters, exhibition of diseased specimens,

ment in holding about large areas of water, both  
 for domestic and landscape purposes, including certain  
 white lines. Several small islands were noted in the  
 vicinity of some islands. These proved to be from the  
 numerous, and cards for these and water were located, which  
 conditions are as true in other places, and their watch  
 should be kept for such purposes, especially in western  
 and sections.

It is not surprising that many of the property  
 shipments as listed on the cards could not be located, for  
 the position of this district, especially in terms and por-  
 tions of history, is more complicated than perhaps any other  
 state in the Union. Many items were mentioned, with the  
 stock card, either having been sold or cattle or other items  
 neglected and bought. In the entire district there are 24  
 relocated cards. An illustration of conditions; the  
 writer will cite the case as found in which is situated  
 County, Kansas. Of the 125 cards for that town, 63 were  
 unable to be located; 25 had moved, and others were to  
 be sent; 35 were found to be dead, and 16 missing. This  
 is the largest percentage noted, but should not be applied  
 to all sections, however.

The people as a whole, found from the entire dis-  
 trict, and movement of the disease and its devastating char-  
 acter. Additional conditions should be found with vigor,  
 however, the use of posters, exhibition of diseased specimens,

and the press. The various Fairs which are held each year throughout the Northwest would be ideal places for such exhibitions, together with the distribution of literature.

Though the disease has not appeared in the West, as far as is known, the matter of giving it wide publicity should receive as much attention here as in some of the Eastern states where it is strongly entrenched.

The horticultural inspectors, together with their deputies, should make themselves fully acquainted with the disease in all its forms. They should be required to make more thorough examinations and inspections of nursery stock, especially that transmitted through the mails by parcel post. Many such shipments are never inspected, owing to the absence in some cases of a deputy inspector in that particular region. The personnel of the deputy inspectors should be raised, as the present writer is informed that express agents very often act as inspectors. Field Assistant Norman W. Scherer has incorporated in his report for Idaho the following, which might be applicable to the other subdistricts: "\*\*\* 2. That the County Agricultural Agents be deputized as Deputy Nursery Inspectors. This would mean educated and active men as inspectors, well distributed over the state. At present there are 15 Deputy inspectors and 40 County Agricultural Agents. The money used at present for the Deputy Inspectors could profitably be used with County Agent funds. With this suggestion in operation all nursery

and the press. The various trials which are held each year throughout the Northwest would be ideal places for such exhibitions, together with the distribution of literature. Though the disease has not occurred in the West, as far as is known, the matter of giving it wide publicity should receive as much attention here as in some of the Eastern States where it is commonly encountered.

The horticultural inspectors, together with their deputies, should make themselves fully acquainted with the disease in all its forms. They should be required to make more thorough examinations and inspections of nursery stock, especially that transmitted through the mails by parcel post. Many such shipments are never inspected, owing to the absence in some cases of a deputy inspector in that particular region. The personnel of the deputy inspectors should be raised, as the present system is inadequate to express agents very often act as inspectors. Their duties and powers are interpreted to the contrary in many cases. The following, which might be applicable to the other subdivisions: "Art. 2. That the County Agricultural Agents be designated as deputy nursery inspectors. This would mean educated and active men as inspectors, well distributed over the State. At present there are 18 deputy inspectors and 40 County Agricultural Agents. The former used at present for the deputy inspectors could profitably be used for nursery agent tasks. With this suggestion in operation all nursery

stock could be inspected free gratis to the parties consigned,-- doing entirely away with the present charge system for inspection, which is not relished by the receiving public."

The men in the Forest Service should become more fully acquainted with the rust. In an interview with the Acting District Forester, Mr. Rutledge, he stated that the men are little acquainted with the disease. He offers his co-operation in this work, in any way that would be of advantage to the Plant Bureau. He further stated that Forest rangers, covering a great deal of ground as they do, might be of some service.

About 85% of the inspections made during this field season were from nurseries located in Oregon and Washington. The remaining uninspected cards on file represent shipments from Montana and Middle Western nurseries. Eastern nurseries, as well as all others not already asked, occurring on the Government blacklist, will be requested to send in records of sales of their stock into this district. However, it has been suggested that it might be more advantageous to have the Government men go direct to these various nurseries and obtain the required data. The time spent by the nurseries themselves in compiling lists

stock could be traced to the parties con-

cerned,-- being entirely new, with the present owner

negotiated for inspection, which is not related by the re-

ceiving parties."

The men in the forest service should become more

fully acquainted with the forest. In an interview with the

acting district forester, Mr. [redacted], he stated that the

men are little acquainted with the disease. He offers his

co-operation in this work, in any way that would be of ad-

vantage to the forest service. He further stated that forest

guards, covering a great deal of ground as they go, might

be of some service.

About 80% of the inspections made during this

field season were from nurseries located in Oregon and

Washington. The remaining [redacted] were on the [redacted]

sent shipments from Kentucky and Middle [redacted] nurseries.

Western nurseries, as well as all others not already [redacted]

occurring on the Government checklist, will be requested

to send in records of sales of their stock into this dis-

trict. However, it has been suggested that it might be

more advantageous to have the Government men go direct to

these various nurseries and obtain the required data. The

data sent by the nurseries themselves in connection with

of sales for this work has been considerable, and a few have begrudged such time, though as a whole the co-operation has been very good.

Considering the small force of field men, which would not perhaps average more than two for the entire season, and the territory over which they were obliged to travel, it is the opinion of the writers that considerable work was accomplished. If the blister rust inspection is to proceed in the same way during the 1919 season, with the hope of inspecting all cards now on hand, a large force of experienced men will be required. There seems to be no other way than to continue along such lines, in order to prevent the blister rust from becoming seated in the Northwest.

of cases for the winter season, and a few  
have been brought back this, though as a whole the co-operation  
has been very good.  
The winter season has been very good, which

was not perhaps expected, and for the entire  
season, and the territory over which they were obliged to  
travel, it is an opinion of the winter that considerable  
work was accomplished. In the winter past, inspection is  
to proceed in the same way as in the last season, and the  
force of inspecting all cases now in hand, a large force of  
experienced men will be required. There seems to be no  
other way than to continue such a force, in order to  
prevent the winter past from being a failure, and to the  
best.
